

Friday, 12 March 2021

Good afternoon suppliers,

We are increasing our milk price today ahead of what we had originally planned. This is to give all our suppliers assurance that markets are improving and UDC is working hard to reward our suppliers for your efforts this season to date. We will have a separate newsletter out next week with a market update.

The base price increase is 10c/kgms (8c Fat, 12c Protein) and retrospective from the beginning of this season.

Below is what you can expect:

1. Step Up retrospectively (production 1st July-28th Feb) paid out with the milk payment on the 28th March
2. New base pricing from 1 March onwards incl the \$0.10/kg step up

Should you have any questions please contact your Milk Supply Manager.

Regards,

Dean & all at UDC.
